ABDUL REHAMAN A

Technical Lead | PHP and Laravel | Backend and Full Stack Engineering

Bengaluru, India | +91 7019697942 | abdulrahmaniq7@gmail.com

PROFESSIONAL SUMMARY

Software engineer with 13 years of experience in backend and full stack development, API integrations, and solution architecture. Experience coordinating 5+ frontend, backend, and Android developers through requirements analysis, sprint planning, and delivery tracking. Hands-on experience in Laravel APIs, CodeIgniter modernization, database optimization, and production releases.

CORE COMPETENCIES

Sprint planning; delivery tracking; cross-functional leadership; requirements analysis; stakeholder communication; code reviews; legacy modernization; API and database design; production releases.

TECHNICAL SKILLS

Backend and APIs: PHP, Laravel, CodeIgniter, REST APIs, GraphQL, JWT, Laravel Sanctum, payment gateway integrations, and Composer.

Data and messaging: MySQL, MariaDB, Redis, RabbitMQ, and AWS SQS. **Cloud:** AWS Lambda and AWS-hosted applications.

Frontend: JavaScript, React, Redux, Next.js, Vue.js, AngularJS 1.x, jQuery, HTML, and CSS.

Tools and quality: Git, Jira, Docker, Jenkins, Linux, Apache, PHPStan, Postman, Test-Driven Development (TDD), application testing, and query optimization.

AI-assisted development: Cursor and GitHub Copilot; encouraged developer adoption. **Ongoing learning:** AI fundamentals and AI agents.

PROFESSIONAL EXPERIENCE

Lead - Technology

Synechron Technologies Pvt. Ltd. | Bengaluru, India | Apr 2026 - Jul 2026

- Completed client-project onboarding and payment-domain knowledge transfer; participated in CI/CD, Jenkins, Git, and enterprise development training.

Senior Software Development Engineer

Anarock | Bengaluru, India | Sep 2025 - Apr 2026

- Collaborated with the Product Manager on requirement analysis, implementation discussions, and product feature development.
- Migrated multiple legacy CodeIgniter 1 modules to CodeIgniter 4, including incident reporting, facility management, and a dynamic app layout design system.
- Worked with Laravel 5.6 for authentication within the legacy application, alongside the CodeIgniter core.
- Optimized PHP cron scripts used in AWS SQS workflows and database queries; contributed to Redis-based application functionality.
- Implemented React changes for JWT token reading and login verification, and conducted code reviews to improve implementation quality.

Solution Architect

Fo-Fi | Bengaluru, India | Jan 2020 - Jun 2025

- Analyzed requirements with clients and internal departments, translating business needs into application features and API requirements.
- Coordinated 5+ frontend, backend, and Android developers, including senior engineers; clarified requirements, shared API contracts, tracked progress, and participated in sprint planning.
- Built Laravel APIs for IPTV, internet, and VoIP services, covering registration and subscription workflows; developed and tested application features.
- Designed architecture and MariaDB schemas, built React/Next.js features, and managed Git version control, deployments, and application maintenance.

Associate Software Development Engineer

Augur Technologies | Bengaluru, India | Mar 2017 - Jan 2020

- Developed ISP ERP functionality using PHP and MySQL and led legacy application migration to CodeIgniter.

Software Engineer, Product Development

Buymediaspace | Bengaluru, India | Nov 2015 - Feb 2017

- Built admin/backend and customer-facing modules from scratch using CodeIgniter and AngularJS 1.x; released modules to AWS-hosted production.
- Integrated mPDF and CCAvenue for PDF generation, invoicing, and payment processing.

Web Developer

Zeeways Software | Bengaluru, India | Mar 2014 - Oct 2015

- Developed backend functionality for a classified ads platform, optimizing MySQL queries and indexes.
- Built AJAX interactions and bulk import/export features, and translated client requirements into application changes.

Junior Software Development Engineer

Zeeways Software | Bengaluru, India | Feb 2012 - Mar 2013

- Built and maintained classified ads features with PHP, MySQL, and AJAX; supported query optimization, bulk data operations, and defect resolution.

KEY PROJECTS

ISP ERP and Customer Self Service Platform | BBNL Netmon and Payurbills
Architected an ISP ERP from scratch covering client/customer and employee management; internet, VoIP, IPTV, IP camera and gaming subscriptions; combo/custom plans; renewals, invoices, wallets, reports, digital KYC, and multiple payment gateways.

Built APIs for client and consumer mobile apps: ERP administration for clients, and renewals, complaints/tickets, profile updates, and bandwidth consumption for consumers. Supported these self-service workflows through Payurbills.

Legacy Platform Modernization | Anarock
Migrated incident reporting, facility management, and dynamic app layouts from CodeIgniter 1 to 4; integrated authentication and optimized background processing.

Advertising Platform | Buymediaspace
Built Aptomida admin/backend and Buymediaspace frontend modules with CodeIgniter and AngularJS 1.x; integrated payments and released modules on AWS.

ACHIEVEMENTS AND CERTIFICATIONS

- Coordinated 5+ developers, including senior engineers, across frontend, backend, and Android development.
- Architected an ISP ERP from scratch, connecting service subscriptions, billing, customer self-service, and mobile app APIs.
- Migrated incident reporting, facility management, and dynamic app layout modules from CodeIgniter 1 to CodeIgniter 4.
